BAMBOO SILK

It takes incredible expertise to create such a collection of machine-made rugs. Elements such as fine thread (Bamboo silk type), special machines, detailed designs and patterns are required. The density of the collection reaches from the highest to machine-made (2,000,000 knots per square meter). Due to the nature of the thread, this is a hypoallergenic and anti-microbial carpet. It gives a delicate selection comparable to hand-made carpets, capable of upgrading the space to high levels of aesthetics.

AFGAN

The Aghan collection is influenced by the eponymous Khal Mohammadi handmade rugs. They are distinguished by dark shades of tile-brown, repeating geometric patterns and dark fringes, just like the all-wool handmade ones. They are preferred in spaces with a light colored floor because of the contrast they create.
